Important Safety Instructions

• Turn off all power to the Junction Box before making any electrical adjustments.
• Always disconnect the power before installing/replacing bulbs, during cleaning or maintenance.
• To avoid the risk of fire, do not exceed the recommended wattage.
• Consult a qualified, licensed electrician before installation.

To Assemble

1. Use the supplied mounting screws (2x) to fasten the mounting plate to the J-Box.

2. Additional holes are added to the mounting plate to allow for extra mounting screw hardware (not provided), depending on various ceiling constructions. Anchors or ceiling blocking is strongly advised.

3. Hold the ceiling plate near the installed mounting plate, and using the supplied wire nuts, connect the wires from the fixture to those in the J-box.

4. Push the ceiling plate over the mounting plate, flush with the ceiling and tighten the 4x set screw using the supplied allen key.

5. Screw in each light bulb (2x). Do not overtighten.

6. Align the reeded shade with the locator pins (4x), then slide it over the locator pins and flush with the ceiling plate.

7. Push the bracket over the reeded shade to the slot in the ceiling plate, and align the 4x thumb screw hole with those in the ceiling plate. Secure the bracket to the ceiling plate using thumb screws (4x).

8. Turn on the power to ensure you have made good wire connections.
