

# Installation Instructions

## Vidame Floor Lamp

### Important Safety Instructions

- Turn off all power to the Junction Box before making any electrical adjustments.
- Always disconnect the power before installing/replacing bulbs, during cleaning or maintenance.
- To avoid the risk of fire, do not exceed the recommended wattage.
- Consult a qualified, licensed electrician before installation.

### To Assemble

1. Gently lift the lamp body out of the packaging and place on a protected surface.
2. Remove the phenolic ring from the socket and slide the shade over the socket cover and position it onto the lamp body. Ensure proper alignment, then secure it in place using the phenolic ring.
3. Screw in the bulb. **\*DO NOT OVERTIGHTEN THE BULB\***
4. Adjust the stem to the desired height and secure by tightening the thumb screw.
5. Plug in the cord and rotate the dimmer knob to confirm the bulb is getting power.

Please note: Do not adjust the stem height while the lamp is horizontal (laying on the floor). Doing so causes uneven pressure on the rod, which may result in damage to the finish. Adjust the height while the lamp is standing upright.

### Care Instructions

- Wipe with a soft cloth. Do not use chemical cleaner.
