

# Installation Instructions

## Girardot Table Lamp

### Important Safety Instructions

- Turn off all power to the Junction Box before making any electrical adjustments.
- Always disconnect the power before installing/replacing bulbs, during cleaning or maintenance.
- To avoid the risk of fire, do not exceed the recommended wattage.
- Consult a qualified, licensed electrician before installation.

### To Assemble

1. Gently lift the lamp body out of the packaging and place on a protected surface.
2. Position the brass base vertically, with the cord at the bottom, and align with the travertine base so the slots in both pieces match up. Gently slide into place.
3. Secure the two bases with the bottom bracket. The bracket will fit along the bottom of the brass base and into a notch on the travertine base.
4. Insert the machine screws (2X) through the holes in the bottom bracket and tighten.
5. Remove the phenolic ring from the socket and slide the shade over the socket cover and position it onto the lamp body. Ensure proper alignment, then secure it in place using the phenolic ring.
6. Screw in the bulb. **\*DO NOT OVERTIGHTEN THE BULB\***
7. Plug in the cord and rotate the dimmer knob to confirm the bulb is getting power.
