

# Installation Instructions

Caron Flush Mount

## Important Safety Instructions

- Turn off all power to the Junction Box before making any electrical adjustments.
- Always disconnect the power before installing/replacing bulbs, during cleaning or maintenance.
- To avoid the risk of fire, do not exceed the recommended wattage.
- Consult a qualified, licensed electrician before installation.

## To Assemble

1. Install the beveled mounting disc to the J-box using the supplied machine screw hardware (2X).
  2. Hold the ceiling plate next to the J-Box, and connect the wires to those in the J-box using the Wago wire connectors.
  3. Loosen each set screw (3X) at the 120° position on the flush mount ceiling plate.
  4. Push the ceiling plate over the mounting disc, flush with the ceiling and tighten each set screw (3X).
  5. Slide the shade (1X) over the bulb and align it with the ceiling plate. Secure the shade by screwing in the threaded ring to the socket cover using the tool (provided). Over-tightening the ring may cause the glass to crack. Tighten only until snug—do not force.
  6. Screw in the bulb (1X).
- \*DO NOT OVERTIGHTEN THE BULBS\***
7. Turn on the power to confirm you have made good wire connections.

## Care Instructions

- Wipe with a soft cloth. Do not use chemical cleaner.
